\*\*\*\*\* **A.C.E.** \*\*\*\*\*

**(AIRCRAFT COURTESY EVALUATION)**

***What a deal !!!!!***

*ACE offers G/A aircraft owner/operators an opportunity to receive a "free" evaluation of their aircraft airworthiness condition through physical and document reviews conducted by former NTSB investigators and FAA qualified maintenance personnel. This program is sponsored by the local FAA district office; however, there is no risk of enforcement action from the FAA resulting from this evaluation. As a matter of fact, it is against the law for any records of participants in this program to be retained by any agency. The concern that promotes this activity is to ensure that aircraft owner/operators are in a safe condition for flight, have the latest and current data for their aircraft and documents are in order. Each participant will be provided with a current list of Airframe, Engine and Propeller airworthiness directives and Type Certificate Data Sheet.*

→

- **Benefits:** Increase communications and trust between the FAA and the aviation community and provides an opportunity to identify potential deficiencies that might otherwise go unnoticed.

The ACE program does not meet requirements of an annual, progressive or periodic inspection. Maintenance personnel/documents must be prepared: Complete and return the attached "INFOSHEET" to Elena or Mike Klasing at (407)896-0442, fax 896-0471, by November 16, 1996.

***Slots are limited !! Return or call- in your "infosheet" early !!***

For more details call Obie Young, SPM, Bill Hoenstine, ASPM, or Ben Coleman A/W ASPM, at (407)648-6956
